23
24This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and creases. A dark, irregular stain is visible along the left edge, possibly from the binding or a previous owner. The binding edge on the left shows the stitching and the inner cover material.

3

DEATH INDEX
1902

—

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and a dark, irregular stain near the bottom left corner. A faint, dark horizontal line is visible near the top edge. The binding edge on the left is visible.

13

[illegible]

11

A blank, lined page from a notebook. The page features horizontal ruling lines and a vertical margin line on the left side. The paper appears slightly aged or off-white.

15

[illegible]

1000

This image shows a single, blank page from a lined notebook. The paper has horizontal ruling lines spaced evenly down its length. On the left side, there are three visible metal binder rings or staples holding the page in place. The page itself is off-white or light gray, showing some minor texture and slight discoloration, particularly towards the edges. There is no handwriting or printed text on the page.

32

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, particularly along the edges. A dark, possibly black, binding edge is visible on the left side of the page. The overall tone is warm and slightly off-white, characteristic of old paper.

بَارِ

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, particularly along the edges. A dark, possibly black, binding edge is visible on the left side of the page. The overall tone is warm and slightly yellowed, characteristic of old paper.

5

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and dark smudges, particularly along the left edge, which may be due to the binding or handling over time. The right edge of the page is slightly irregular.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and dark smudges, particularly along the left edge, which may be due to the binding or handling over time. The right edge of the page is slightly irregular.

Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair, viewing a screen displaying a target (a red dot) and a starting point (a green dot). The subject's hand is positioned at the starting point, and the target is located at a distance of 10 cm from the starting point. The subject is instructed to move their hand from the starting point to the target. The screen is positioned at a distance of 10 cm from the starting point. The subject's hand is positioned at the starting point, and the target is located at a distance of 10 cm from the starting point. The subject is instructed to move their hand from the starting point to the target. The screen is positioned at a distance of 10 cm from the starting point.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. The left edge of the page shows the binding structure, including stitching or stitching holes. The overall tone is warm and slightly yellowed, consistent with the 'cream' description.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, particularly along the edges. A dark, possibly black, binding edge is visible on the left side of the page. The overall tone is warm and slightly off-white, characteristic of old paper.

511

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and creases. A dark, irregular stain is visible along the left edge, possibly from the binding or a previous owner. The binding edge on the left shows the stitching and the inner cover material.

73

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. The left edge of the page is bound, showing the stitching or staples of the book's binding. There is no text or other markings on the page.

49.2

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and dark smudges, particularly along the left edge, which may be due to the binding or handling over time. The right edge of the page is slightly irregular.
